

NEW!
ESF-III
NOW AVAILABLE!

SIMPLY AMAZING!

NEW LOW PRICE—\$99.50

How else can you describe the *Exatron Stringy Floppy* system? You could say that it's an under \$100, compact, reliable, robust, high-speed, computer-controlled, easy-to-use, well-supported alternative to disk drives, for a Model I or III TRS-80—*simply amazing!*

Amazing Technology

Based on a special endless-loop tape cartridge, called a Wafer, the ESF system was designed specifically for computer data storage. The direct-drive transport mechanism has only one moving part, and data is transferred to and from the tape at a rate of 7200 baud.

Amazing System

Thousands of ESF buyers have been amazed by 16K programs loading in less than 20 seconds; automatic verification of saved programs; up to 70K bytes, and 99 files, on a single Wafer; a ROM operating system (RAM based in Model III); no need for an expansion interface; and 1-year parts and labor warranty.

Amazing Support

With an ESF system you don't just get a piece of hardware, you get total support with hundreds of user workshops; dozens of high-quality, reasonably priced programs (such as Electric Pencil 2.0, Electric Spreadsheet, File Management System and Technical Word Processor); access to hundreds of FREE public-domain programs; an @NEWS user column in 80-US; @LOAD program magazine; and a toll-free information line.

Amaze Yourself

To see for yourself how amazing the ESF system is, or for more detailed information, call us toll-free at **800-538-8559** (inside California **408-737-7111**) and take advantage of our 30-day money-back return policy. Copies of the 80-page manual are available for \$4.95 (which you can credit towards an ESF), and while you're on the line ask about our equally amazing 64K RAM/ROM board for the Model I.
